

# **Explorations:**

## **An Open Invitation to Biological Anthropology**

Published by: American Anthropological Association  
CC BY-NC 4.0 International, 2019

*ISBN* (ebook) - 978-1-931303-62-0

*ISBN* (print) - 978-1-931303-63-7

Edited by:

*Beth Shook, Ph.D., California State University, Chico*

*Katie Nelson, Ph.D., Inver Hills Community College*

*Kelsie Aguilera, M.A., University of Hawaii: Leeward Community College*

*Lara Braff, Ph.D., Grossmont College*

### **TABLE OF CONTENTS**

#### **Chapter 1: Introduction to Biological Anthropology**

*Katie Nelson, Ph.D., Inver Hills Community College*

*Lara Braff, Ph.D., Grossmont College*

*Beth Shook, Ph.D., California State University, Chico*

*Kelsie Aguilera, M.A., University of Hawaii: Leeward Community College*

#### **WHAT IS ANTHROPOLOGY?**

Holism

Comparison

Dynamism

Fieldwork

A Brief History of Anthropology

#### **THE SUBDISCIPLINES**

Cultural Anthropology

Linguistic Anthropology

Archaeology

Biological Anthropology

Applied Anthropology

#### **WHAT IS BIOLOGICAL ANTHROPOLOGY?**

The Scope of Biological Anthropology

Primateology  
Paleoanthropology  
Molecular Anthropology  
Bioarchaeology  
Forensic Anthropology  
Human Biology

## ANTHROPOLOGISTS AS SCIENTISTS

Recognizing Science

*Science Studies the Physical and Natural World and How It Works*

*Scientific Explanations Must Be Testable and Refutable*

*Science Relies on Empirical Evidence*

*Science Involves the Scientific Community*

How Science Works: The Scientific Method

Hypotheses, Theories, and Laws

## WAYS OF KNOWING: SCIENCE, FAITH, AND ANTHROPOLOGY

### **Chapter Two: Evolution**

*Jonathan Marks, Ph.D., University of North Carolina at Charlotte*

THE SCIENCE OF WHO WE ARE AND WHERE WE COME FROM

PRE-DARWINIAN INTELLECTUAL TRENDS

THE TRANSMUTATION HYPOTHESIS

POST-DARWINIAN THEORIES AND DISPUTES

MOLECULAR EVOLUTION

ORGANISMAL AND MULTILEVEL EVOLUTION

THE BIOPOLITICS OF HEREDITY

ADAPTATION AND ADAPTATIONISM

MISCONCEPTIONS ABOUT HUMAN EVOLUTION

### **Chapter 3: Introduction to Molecular Biology and Genetics**

*Hayley Mann, M.A., Binghamton University*

*Xazmin Lowman, Ph.D., University of California, Irvine*

*Malaina Gaddis, Ph.D.*

CELLS AND MOLECULES

Molecules of Life

Cells

Animal Cell Organelles

## INTRODUCTION TO GENETICS

SPECIAL TOPIC: FOCUS ON NATIVE AMERICAN IMMUNITY AND EUROPEAN DISEASES—A STUDY OF ANCIENT DNA

DNA Carries Hereditary Information

DNA Structure

DNA is Highly Organized within the Nucleus

## DNA REPLICATION AND CELL DIVISION

DNA Replication

DNA Mutations

SPECIAL TOPIC: THE CELL CYCLE AND IMMORTALITY OF CANCER CELLS

Mitotic Cell Division

Meiotic Cell Division

Chromosomal Disorders

## PROTEIN SYNTHESIS

Transcription and Translation

SPECIAL TOPIC: GENETIC REGULATION OF THE LACTASE (*LCT*) GENE

## MENDELIAN GENETICS AND OTHER PATTERNS OF INHERITANCE

Mendelian Genetics

Example of Mendelian Inheritance: The ABO Blood Group System

Mendelian Patterns of Inheritance and Pedigrees

Complexity Surrounding Mendelian Inheritance

## POLYGENIC TRAITS

## GENOMICS AND EPIGENETICS

Genomics

Epigenetics

SPECIAL TOPIC: EPIGENETICS AND X CHROMOSOME INACTIVATION

## GENETIC TESTING

Polymerase chain reaction (PCR) and Sanger sequencing

Genetic biotechnology and clinical testing

Direct-to-consumer (DTC) genetic testing

## **Chapter 4: Forces of Evolution**

*Andrea J. Alveshere, Ph.D., Western Illinois University*

## THE MODERN SYNTHESIS

Historical Framework

*Rethinking Darwin*

*Rediscovering Mendel*

Tying It All Together

POPULATION GENETICS

Defining Species and Populations and the Variations Within Them

Defining Evolution

THE FORCES OF EVOLUTION

Mutation

*Point Mutations*

*Insertions and Deletions*

*Chromosomal Alterations*

*Case Study #1: Neurofibromatosis Type 1 (NF1)*

Genetic Drift

*Sexual Reproduction and Random Inheritance*

*Population Bottlenecks*

*Founder Effects*

Gene Flow

*Admixture*

Natural Selection

*Directional, Balancing/Stabilizing, and Disruptive/Diversifying Selection*

*Case Study #2 : Sickle Cell Anemia*

*Sexual Selection*

SPECIAL TOPIC: THE REAL PRIMORDIAL CELLS—*DICTYOSTELIUM DISCOIDEUM*

STUDYING EVOLUTION IN ACTION

The Hardy-Weinberg Equilibrium

Interpreting Evolutionary Change

*Non-Random Mating*

Micro- to Macroevolution

SPECIAL TOPIC: CALCULATING THE HARDY-WEINBERG EQUILIBRIUM

**Chapter 5: Meet the Living Primates**

*Stephanie Etting, Ph.D., Sacramento City College*

WHAT IS A PRIMATE?

Types of Traits

Primate Suite of Traits

KEY TRAITS USED TO DISTINGUISH BETWEEN PRIMATE TAXA

Dental Characteristics

*Frugivores*

*Insectivores*

*Folivores*

Behavioral Adaptations

Locomotor Adaptations

## PRIMATE DIVERSITY

Ways of Organizing Taxa

Suborder Strepsirrhini

*Lemurs of Madagascar*

*Lorises, Pottos, and Galagos of Asia and Africa*

Suborder Haplorrhini

*Infraorder Tarsiiformes of Asia*

*Infraorder Platyrrhini of Central and South America*

*Infraorder Catarrhini of Asia and Africa*

*Superfamily Cercopithecoidea of Africa and Asia*

SPECIAL TOPIC: PRIMATES IN CULTURE AND RELIGION

*Superfamily Hominoidea of Africa and Asia*

## LEARNING FROM PRIMATES

Conclusion

## **Chapter 6: Primate Ecology and Behavior**

*Karin Enstam Jaffe, Ph.D., Sonoma State University*

### ECOLOGY

Primate Diets

*Body Size and Diet*

*Food Abundance and Distribution*

Competition for Food

*Effects of Food Abundance and Distribution on Interactions Between and Within Groups*

Community Ecology

Predation

SPECIAL TOPIC: PRIMATE CONSERVATION

### SOCIALITY, RESIDENCY PATTERNS, AND DISPERSAL

Why Do Primates Live in Groups?

*Feeding Competition*

*Predator Avoidance*

*Polyspecific Associations*

Dispersal: Who Goes, Who Stays, and Why?

*Costs of Dispersal*

*Benefits of Dispersal*

## REPRODUCTIVE STRATEGIES

Parental Investment

Sexual Selection

*Intrasexual Selection: Competition for Mates*

*Intersexual Selection: Mate Choice*

Social and Mating Systems

*When Females Are Solitary*

SPECIAL TOPIC: WOMEN IN PRIMATOLOGY: MEET “THE TRIMATES”

*When Females Live in Groups*

## COMMUNICATION

Forms of Communication

*Vocal Communication*

*Visual Communication*

*Olfactory Communication*

*Tactile Communication*

## THE QUESTION OF CULTURE

Examples of Culture in Primates

*Chimpanzee Culture*

*Cultural Transmission in Macaques*

## CONCLUSION

## **Chapter 7: Understanding the Fossil Context**

*Sarah S. King, Ph.D., Cerro Coso Community College*

*Lee Anne Zajicek, B.A.*

## FOSSIL STUDY: AN EVOLVING PROCESS

Mary Anning and the Age of Wonder

Developing Modern Methods

## EARTH: IT'S OLDER THAN DIRT

Geologic Processes

## FOSSILS: PRESERVING PREHISTORIC LIFE

Taphonomy

Preservation of Biological Remains

## FOSSILIZATION

Types of Fossils

*Plants*

*Human/Animal Remains*

*Amber*  
*Asphalt*  
*Igneous Rock*  
*Trace Fossils*  
*Pseudofossils*

#### SPECIAL TOPIC: LAETOLI FOOTPRINTS

#### VOICES FROM THE PAST: WHAT FOSSILS CAN TELL US

Dating Methods

*Relative Dating*

*Chronometric Dating*

Environmental Reconstruction

*Global Temperature Reconstruction*

*Diet Reconstruction*

*Migration*

#### SPECIAL TOPIC: COLD CASE NAIA

### **Chapter 8: Primate Evolution**

*Jonathan M. G. Perry, Ph.D., The Johns Hopkins University School of Medicine*

*Stephanie L. Canington, B.A., The Johns Hopkins University School of Medicine*

#### HOW TO DIAGNOSE A PRIMATE

#### MAJOR HYPOTHESES ABOUT PRIMATE ORIGINS

Arboreal Hypothesis

Visual Predation Hypothesis

Angiosperm-Primate Coevolution Hypothesis

#### THE ORIGIN OF PRIMATES

Paleocene: Mammals in the Wake of Dinosaur Extinctions

Plesiadapiforms, the Archaic Primates

*Geographic and Temporal Distribution*

*General Morphological Features*

*Debate: Relationship of Plesiadapiforms to True Primates*

*Geographic and Temporal Distribution*

*Adapoid Diversity*

*Omomyoid Diversity*

#### THE EMERGENCE OF MODERN PRIMATE GROUPS

Origins of Crown Strepsirrhines

The Fossil Record of Tarsi

Climate Change and the Paleogeography of Modern Primate Origins

Competing Hypotheses for the Origin of Anthropoids

*Adapoid Origin Hypothesis*

*Omomyoid Origin Hypothesis*

*Tarsier Origin Hypothesis*

Early Anthropoid Fossils in Africa

*General Morphology of Anthropoids*

*Fayum Anthropoid Families*

Early Anthropoid Fossils in Asia

*Eosimiids*

*Amphipithecids*

Platyrrhine Dispersal to South America

SPECIAL TOPIC: JONATHAN PERRY AND PRIMATES OF THE EXTREME SOUTH

PLANET OF APES

Geologic Activity and Climate Change in the Miocene

Geographic Distribution: Africa, Asia, Europe

Where Are the Monkeys? Old World Monkey Diversity in the Miocene

The Story of Us, the Apes

*African Ape Diversity*

*Eurasian Ape Diversity*

The Origins of Extant Apes

*Lesser Ape Origins and Fossils*

*Great Ape Origins and Fossils*

## **Chapter 9: Early Hominins**

*Lindsay Hunter*

*Nomawethu Hlazo*

*Silindokuhle Mavuso*

*Rosa Moll*

*Navishni Naidoo*

*Kimberleigh Tommy*

*Kerryn Warren*

DEFINING HOMININS

ANCESTRAL AND DERIVED TRAITS

PALEOENVIRONMENTS

Environment and Hominin Evolution

GEOLOGY IN PALEOANTHROPOLOGY

The Cradle of Humankind, South Africa

East African Rift System (EARS)

## LOCOMOTION: BIPEDALISM

- Bipedalism: Origin and Evolution
- Skeletal Adaptations for Bipedalism
- Bipedalism in Early Hominins
- Bipedalism in *Australopithecus*
- East African *Australopithecus*
- South African *Australopithecus*

## HOMININ DENTITION

- SPECIAL TOPIC: TAUNG CHILD
- General Dental Trends in Early Hominins

## EARLY HOMININS: *SAHELANTHROPUS*, *ORRORIN*, *ARDIPITHECUS*

- Sahelanthropus*
- Orrorin*
- Ardipithecus*

## THE GENUS *AUSTRALOPITHECUS*

- Gracile Australopithecines
  - Australopithecus anamensis*
  - Australopithecus afarensis*
  - Australopithecus prometheus*
  - Australopithecus bahrelghazali*
  - Australopithecus deyiremada*
  - Australopithecus africanus*
  - Australopithecus sediba*
- Paranthropus* “Robust” Australopithecines
  - Paranthropus aethiopicus*
  - Paranthropus boisei*
  - Paranthropus robustus*

## EARLY TOOL USE AND TECHNOLOGY

- Earlier Stone Age Technology

## **Chapter 10: Early Members of the Genus *Homo***

*Bonnie Yoshida-Levine Ph.D., Grossmont College*

### DEFINING THE GENUS *HOMO*

### CLIMATE CHANGE AND HUMAN EVOLUTION

### *HOMO HABILIS*: EARLIEST MEMBERS OF OUR GENUS

- Discovery and Naming
- Controversies Over Classification of *Homo habilis*

*How Many Species of Homo habilis?*

Homo habilis: Homo or Australopithecus?

#### **HOMO HABILIS CULTURE AND LIFEWAYS**

Early Stone Tools

Stone Tool Use and the Diet of Early *Homo*

#### **HOMO ERECTUS: BIOLOGICAL AND CULTURAL INNOVATIONS**

*Homo erectus* Anatomy

*Homo erectus* in Africa

Regional Discoveries Outside Africa

*Indonesia*

*China*

*Western Eurasia*

*Europe*

#### **HOMO ERECTUS LIFEWAYS**

Tool Technology: Acheulean Tool Industry

Tool Use and Cognitive Abilities of *Homo erectus*

Subsistence and Diet

*Meat-eating and Increased Brain Size*

*Evidence for Dietary Versatility in Homo erectus*

*Tool use, Cooking and Fire*

Migration out of Africa

Life History

#### **THE BIG PICTURE OF EARLY HOMO**

Variability in the Fossil Record of Early *Homo*

Trends in the Behavior of Early *Homo*

### **Chapter 11: Archaic *Homo***

*Amanda Wolcott Paskey, M.A., Cosumnes River College*

*AnnMarie Beasley Cisneros, M.A., American River College*

Special Topics Author: *Robyn Humphreys, MSc., University of Cape Town*

#### **BREAKING THE STIGMA OF THE “CAVE MAN”**

#### **THE CHANGING ENVIRONMENT**

#### **DEFINING CHARACTERISTICS OF ARCHAIC *HOMO SAPIENS***

#### **NEANDERTHALS**

Neanderthal Culture and Lifeways

Neanderthal Intelligence

#### **THE MIDDLE STONE AGE: NEANDERTHAL CONTEMPORARIES IN AFRICA**

WHERE DID THEY GO?: THE END OF NEANDERTHALS

DENISOVANS

MODELS OF MODERN HUMAN DISTRIBUTION

HOW DO THESE FIT IN?: *HOMO NALEDI* AND *HOMO FLORESIENSIS*

*Homo naledi*

*Homo floresiensis*

SPECIAL TOPIC: ANCIENT DNA

Sequencing Ancient Genomes

Collecting and Sequencing aDNA

The Discovery of the Denisovans

What Can We Learn About Population Structure of the Neanderthals and Denisovans from aDNA?

How Sequencing Archaic Genomes Can Help Understand Our Own Unique Evolutionary Trajectory as Modern Humans

Hybridization Between Hominin Groups

Confirmed Fossil Hybrids

Neanderthal and Denisovan Derived DNA in Modern Genomes

What Can We Learn About the Process of Hybridization From Ancient DNA?

Hybridization and Modern Human Evolution

The Future of Genetic Studies

## **Chapter 12: Modern *Homo sapiens***

*Keith Chan, Ph.D., University of Missouri: Grossmont College and MiraCosta College*

DEFINING MODERNITY

Skeletal Traits

*Cranial Traits*

*Post-Cranial Gracility*

Behavioral Modernity

FIRST AFRICA, THEN THE WORLD

The Start of Modern *Homo sapiens* in Africa

*Summary of Early Modern H. sapiens in Africa*

Expansion into the Middle East and Asia

*Modern Homo sapiens in the Middle East*

*Modern Homo sapiens of China*

*Other Asian Modern Humans*

*Summary of Modern H. sapiens in the Middle East and Asia*

Crossing to Australia

*Summary of Modern H. sapiens in Australia*

Northwest to Europe

*Upper Paleolithic European Material Culture*

*Summary of Modern H. sapiens in Europe*

Distant Relations: Interbreeding With Archaic Humans Outside Africa

*Interbreeding With Neanderthals*

*Interbreeding With Denisovans*

*Summary of Archaic Human Genetic Introgression*

African Developments

*Summary of Continuing Modern H. sapiens in Africa*

Discovering the Americas

*The Changing Role of Beringia*

*South Through the Americas*

*Summary of Modern H. sapiens in the Americas*

## THE CHAIN REACTION OF AGRICULTURE

The Foraging Tradition

Why Agriculture?

Agriculture Around the World

Cultural Effects of Agriculture

The Future of Humanity

## CONCLUSION

### **Chapter 13: Race and Human Variation**

*Michael B. C. Rivera, Ph.D., University of Cambridge*

## THE HISTORY OF “RACE” CONCEPTS

“Race” in the Classical Era

“Race” During the Scientific Revolution

“Race” and the Dawn of Scientific Racism

“Race” and the Beginnings of Physical Anthropology

## HUMAN VARIATION IN BIOLOGICAL ANTHROPOLOGY TODAY

“Populations” Instead of “Aces”

Human Variation Is Clinal/Continuous (not Discrete)

The Apportionment of Human Variation: Genetic Diversity Is Greater Within-Group Than Between-Groups

Biological Data Fit Isolation-By-Distance and Out-of-Africa Models

Humans Have Higher Homogeneity Compared to Many Other Species

Phenotypic Traits That Reflect Neutral Evolution

Phenotypic Traits That Reflect Natural Selection  
TALKING ABOUT HUMAN BIOLOGICAL VARIATION GOING FORWARD  
SPECIAL TOPIC: MY EXPERIENCES AS A MINORITY ACADEMIC OF COLOR

## **Chapter 14: Human Variation: An Adaptive Significance Approach**

*Leslie E. Fitzpatrick, Ph.D., Mercyhurst University*

STRESS AND HOMEOSTASIS  
ADJUSTMENTS AND ADAPTATIONS

### Adjustments

*Behavioral Adjustments*

*Acclimatory Adjustments: Thermal Stressors*

*Acclimatory Adjustments: Altitudinal Stressors*

*Developmental Adjustments*

### Adaptations

*Adaptation: Altitudinal Adaptation*

*Adaptation: Skin Tone Basics*

*Adaptation: Skin Tone Genetic Regulation*

*Adaptation: Melanogenesis*

*Adaptation: Evolutionary Basis for Skin Tone Variation*

*Adaptation: Shape and Size Variations*

*Adaptation: Shape and Size Variations*

*Adaptation: Lactase Persistence*

*Human Variation: Our Story Continues*

## **Chapter 15: Bioarchaeology and Forensic Anthropology**

*Ashley Kendell, Ph.D., D-ABMDI, California State University, Chico*

*Alex Perrone, M.A., California State University, Chico*

*Colleen Milligan, Ph.D., California State University, Chico*

BIOARCHAEOLOGY  
SPECIAL TOPIC: BIOARCHAEOLOGY IN ACTION  
FORENSIC ANTHROPOLOGY  
INITIAL SKELETAL ANALYSIS

Is It Bone?

Is It Human?

Is It Modern or Archaeological?

How Many Individuals Are Present?

*What Is MNI?*

*Why Calculate MNI?*

## CONSTRUCTING THE BIOLOGICAL PROFILE

Who Is It?

SPECIAL TOPIC: THE SEARCH FOR THE LOST GRAVE OF KING RICHARD III

*Estimating Sex*

*Sex vs. Gender*

*Estimating Ancestry*

*Estimating Age*

*Estimating Stature*

*Identification Using Individualizing Characteristics*

## TRAUMA ANALYSIS

Types of Trauma

Timing of Injury

The Role of the Forensic Anthropologist in Trauma Analysis

## BONE PATHOLOGY

Types of Bone Pathology

*Osteosarcoma*

*Osteogenesis Imperfecta*

*Rickets*

*Achondroplasia*

*Paget's Disease of Bone*

*Diffuse Idiopathic Skeletal Hyperostosis (DISH)*

## TAPHONOMY

What Happened to the Remains After Death?

## ETHICS AND HUMAN RIGHTS

Working with Human Remains

*NAGPRA*

SPECIAL TOPIC: NATIVE AMERICAN GRAVES PROTECTION AND  
REPATRIATION ACT (NAGPRA)

*Modern Human Rights Violations*

*Acting as an Expert in the Medicolegal System*

## **Chapter 16: Contemporary Topics: Human Biology and Health**

*Joylin Namie, PhD., Truckee Meadows Community College*

## PREAGRICULTURAL HUMANS

Diet

Physical Activity Patterns

Infectious Disease

Health Profiles

HEALTH CONSEQUENCES OF THE TRANSITION TO AGRICULTURE AND ANIMAL  
DOMESTICATION

EPIDEMIOLOGICAL TRANSITIONS

OBESITY

Causes of Obesity

SPECIAL TOPIC: DIABETES

CARDIOVASCULAR DISEASE

OSTEOARTHRITIS

CANCER

SPECIAL TOPIC: THE PALEO DIET

STRESS

SYNDEMICS AND THE ECOLOGICAL MODEL

ARE WE STILL EVOLVING?

FOOD FOR THOUGHT

## **Appendix A: Osteology**

*Jason M. Organ, Ph.D., Indiana University School of Medicine*

*Jessica N. Byram, Ph.D., Indiana University School of Medicine*

ANATOMICAL TERMINOLOGY

Directional Terms

SKELETAL FORM AND FUNCTION

Structure and Material of Bone

Bone Shape

Bone Formation

Bone Function

HUMAN SKELETAL SYSTEM

Axial Skeleton

*Skull*

*Vertebral Column*

*Thoracic Cage*

Appendicular Skeleton

*Pectoral Girdle*

*Upper Limb*

*Pelvic Girdle*

*Lower Limb*

STATURE ESTIMATION FROM ADULT SKELETONS  
DIFFERENCES BETWEEN ADULT AND SUBADULT SKELETONS  
COMPARATIVE SKELETAL ANATOMY

**Appendix B: Primate Conservation**

*Mary P. Dinsmore, M.S., Ph.D. candidate, University of Wisconsin – Madison*

*Ilianna E. Anise, B.A., Ph.D. student, University of Wisconsin – Madison*

*Rebekah J. Ellis, B.A., Ph.D. student, University of Wisconsin – Madison*

*Amanda J. Hardie, M.A., Ph.D. candidate, University of Wisconsin – Madison*

*Jacob B. Kraus, B.S., Ph.D. student, University of Wisconsin – Madison*

*Karen B. Strier, Ph.D., University of Wisconsin – Madison*

CURRENT CONSERVATION STATUS OF NONHUMAN PRIMATES

Diversity of Primates

International Union for the Conservation of Nature (IUCN)

Identifying Priorities in Primate Conservation

THREATS TO PRIMATES

Hunting, Poaching, and Wildlife Trade

Habitat Loss, Fragmentation, and Degradation

Climate Change

*Current State*

*Large-Scale Change*

*Small-Scale Change*

Disease

Extinction Vortex

PRIMATE SIGNIFICANCE

Ecological Significance of Primates

Bio-anthropological Significance of Primates

Cultural Significance of Primates

Economic Significance of Primates

WHAT CAN BE DONE?

Role of Research

Non-Governmental Organizations (NGOs) and Community-Based Conservation Work

What Can Readers of This Book Do?

FUTURE PERSPECTIVES

## **Appendix C: Human Behavioral Ecology**

*Kristin Snopkowski, Ph.D., Boise State University*

### HUMAN BEHAVIORAL ECOLOGY

Evolutionary History

Ecology

Both Genes and Environment Influence Behavior

### HOW CAN HUMAN BEHAVIORAL ECOLOGY HELP US UNDERSTAND ALTRUISM?

Kin Selection

Reciprocal Altruism

The “Show-Off” Hypothesis

### MAIN RESEARCH AREAS OF HUMAN BEHAVIORAL ECOLOGY

What Are the Common Misunderstandings Human Behavioral Ecology?

### HOW CAN HUMAN BEHAVIORAL ECOLOGY HELP US UNDERSTAND THE WORLD?
